Continuation of Substance of Interview including description of the general nature of what was discussed: examiner called to suggest examiner's amendment. examiner noted that "finished" would be specifically clarified in the reasons for allowance as not including a fastener awaiting galvanizing -- finished would require a fastener ready to use as is. Also, examiner noted that the claim would be clear that construction connectors used in the building trades would be the required connectors, and that children's toys and pounding blocks would not read on the claims. .
